Re: Beef Processing with Ammonia Hydroxide

To our valued customers,

Integrated Food Service processes commercial and commodity fully cooked beef products for the National School Lunch Program. We do not introduce Lean Finely Textured Beef (LFTB) or Boneless Lean Beef Trimmings (BLBT) or any other ammonium hydroxide treated beef trimmings in the production of any of our processed beef items.

Should you have any questions or need further assistance please do not hesitate to contact me at the office number listed below.

Sincerely,

David Watzke, Director of Operations
