

Purchasing / Warehouse / Printing Services

Goals Closing the Achievement Gap

Purchasing, Warehouse, and Print Services Department supports the goal of the district to close the achievement gap through the following:

1. **Customer Service**
Improve service to our schools and departments, by making the delivery of services fast, efficient, and available. We want all students and staff to know that their needs are met to prepare them for learning and achieving.
2. **Standardization and Equalization**
We will save time and money by standardization of goods and services. This will help to keep the quality of products equal at all sites, and provide the opportunity for schools to take advantage of the benefits of a centralized service center.
3. **Streamline the Process**
Make use of Technology to provide efficiency in the system. Move quickly to implement the remote submission of requisitions, warehouse orders, and print orders. By making the process more efficient, teachers and school staff will be spending their time with students, not on paperwork.
